

## General description

The InnaLabs® AI-Q-2010 navigation grade accelerometer is the leading ITAR-Free choice for high-performance, high accuracy inertial navigation systems. The proven quartz flexure technology inside InnaLabs® accelerometers provides a very high input range and excellent long-term repeatability, which make the AI-Q-2010 an optimal solution for AHRS and strap-down INS in aerospace, marine and land applications.

The AI-Q-2010 features an internal temperature sensor that allows the user to carry out temperature calibration and compensation, enhancing the bias, scale factor and axis misalignment performance over temperature.

In addition to navigation applications, the AI-Q-2010 can be used to calculate speed, distance and inclination in a wide range of applications, ranging from industrial control, test and measurement, transport, oil and gas and civil engineering.

State-of-the-art manufacturing processes enable InnaLabs® to offer AI-Q-2010 accelerometers at competitive prices.
